MetPlas Hosts Waterjet Cutting Seminar Demonstration

Natrona Heights, PA - On September 15th MetPlas hosted a live waterjet cutting seminar for Fox Machinery Associates, Inc, an authorized dealer of FLOW waterjets. Waterjet cutting is still a relatively new technology that has caught the attention of several manufacturers. MetPlas has been perfecting the waterjet cutting process for the past 15 years at their facility in Natrona Heights, PA. They operate three FLOW waterjets in a dedicated waterjet cutting facility that is adjacent to their CNC machining operations. The purpose of the seminar was to explore the advantages of waterjet cutting technology versus other methods of cutting and also some of the latest technology improvements that have been made. By all accounts the seminar was a success! Please contact MetPlas at (800)827-1900 to discuss your interest in waterjet cutting technology.

About Metplas

MetPlas is an ISO 9001-2008 registered manufacturer that specializes in waterjet cutting, precision machining, and assembly of both metals and plastics including materials such as thermoset plastics (GPO3, G10, FR4, etc), thermoplastics (Delrin, Nylon, Teflon, etc), and various alloys (Aluminum, Steel, Copper, etc). Founded in 1981, MetPlas has established itself as a world class supplier to the Energy, Rail Transit, Medical Device, and Defense industries. Visit www.metplas.com to learn more.
