

April 2014 Press Release

Metplas to Exhibit at 2014 IEEE-PES Conference in Chicago

Natrona Heights, PA- Metplas capabilities will be on full display next week at the 2014 IEEE-PES Conference in Chicago. This will be the 50th anniversary for the conference and the third consecutive IEEE-PES Conference that Metplas has attended. According to the Conference program, "This year's event will showcase the technologies, products, companies and minds that will lead our industry through the next fifty years- and beyond. "

"This conference touches on some of our core capabilities including the precision machining of plastic electrical insulation materials, subassemblies for electrical equipment, and copper busbar fabrication. We'll see several existing customers along with a number of potential customers that we'd like to make contact with "remarked Michael Carlin, VP of Sales & Marketing at Metplas. When asked how past shows have benefited Metplas Michael said "Some new business that we've attained over the past couple years can be tied directly to our participation in the IEEE Conference. "

If you're interested in learning more about Metplas capabilities and meeting Metplas personnel you may visit their booth #1934 from Tuesday April 15 through Thursday April 17. More information about the conference can be found at www.ieee-pes.org.

About Metplas

Metplas is an ISO 9001-2008 registered manufacturer that specializes in precision machined plastics and metals. In addition to precision machining, Metplas also offers waterjet cutting, assembly and copper busbar fabrication. Metplas machines parts from materials such as GPO3, FR4, G10, Delrin, Extren and a myriad of other engineered plastics and alloys. More information can be found at www.metplas.com. They can be reached by phone at 800-827-1900 or email mikec@metplas.com.
