## **MetPlas Makes Strategic Addition to It's Management Team**

**Natrona Heights, PA** - MetPlas Incorporated, a machine shop located outside of Pittsburgh, PA has employed a number of high-quality employees since it's inception in 1981. MetPlas added to that list with the hiring of Mr. Russ Garrett, the new Senior Vice President and General Manager.

Mr. Garrett's experience includes over 25 years at Hussey Copper in various capacities including senior sales and operations positions. For the last 7 years Russ was Hussey's Vice President and General Manager of the fabrication business unit. He was responsible for manufacturing and sales of all Hussey's fabricated products in North America and Mexico.

It is interesting to note that MetPlas already supplies several customers with fabricated copper parts including copper bus bars, so Russ' experience in the copper industry will certainly supplement that aspect of their business.

"Russ brings a track record of proven performance, and solid leadership to MetPlas" stated Russ Finsness, President of MetPlas. He went on to say, "His experience will help guide our growth while maintaining MetPlas' record of excellent quality and service."

Asked why he chose MetPlas, Mr. Garret stated, "It became immediately clear to me that MetPlas is a world-class operation that brings value to its customers. I wanted to join a well-established manufacturing company that is poised for growth."

Growth appears to be a common trend at MetPlas in recent years. In fact, they have added 25% to their manufacturing area, increased water jet cutting capacity 50%, added machining capacity with multiple machine purchases, and added several strategically located manufacturers' representatives around the country.

For more information you can visit MetPlas' website at [www.metplas.com](http://www.metplas.com) or call the main number at (800)827-1900.
