## **MetPlas Employees Recognized for Their Loyalty**

**Natrona Heights, PA** - With the shortage of skilled labor in the workforce today it is of the utmost importance for manufacturing companies to retain key talent. MetPlas Incorporated, a waterjet cutting and precision machine shop located in the Pittsburgh area understands that concept and the numbers prove it.

Over 50% of their workforce has a tenure exceeding ten years. The average tenure of a MetPlas employee is an astounding 13.6 years.

Responding to those numbers Russ Finsness, President of MetPlas remarked, "That level of experience in a manufacturing environment is priceless. We make every effort to provide our employees with a stimulating environment that keeps them excited and interested in their work." He continued, "We make a concerted effort to offer robust compensation packages that include excellent health care coverage, gym memberships, 401K contributions, and much more."

At a recent company gathering at MetPlas' facility in Natrona Heights Mr. Finsness recognized his employees that have reached the five, ten, fifteen, and thirty year plateau. Among those recognized for over 30 years of service were Kevin Siverd, Jim Err, and Steve Sabo. Jackie Shaner and Beth Sperski were congratulated for their 15 years of loyalty to MetPlas. The 10-year group included Shawn Stitt and Troy Uzmack. Finally, Kevin Streussnig and Stefani Belles were recognized for reaching the 5-year mark.
